

## **CODEX: CAN IT REALLY IMPACT AMERICA? Do we REALLY Need to Take Action Now???**

by John Hammell

In 1994, the US Congress was flooded with the largest volume of mail ever sent on a single issue during the campaign to pass the Dietary Supplement Health and Education Act. Many Chief Executive Officers of vitamin companies and owners of health food stores in the USA, (as well as many consumers), are burying their HEADS in the SAND when told CODEX is at step 7, and that it could be driven through to completion at step 8 on November 1 at the Codex meeting in Germany.

They just don't think our Congress would ever get away with harmonizing our vitamin laws to a grossly restrictive international standard, and people often ask me what we should say to these people.

### **WHAT TO SAY TO THE HEAD IN THE SAND CROWD**

1. Globalization\_ the push to world government is happening with increased speed: the European Union (EU) is on the verge of ratifying a Constitution, and once that's done, the move to OBLITERATE its member nations will accelerate. (1)

2. President Bush announced in 2002 in a speech before the Organization of American States that the timetable for finalizing the negotiations to create the FTAA (Free Trade Area of the Americas) is January 2005. In form the head in the sander that the FTAA would be a carbon copy of the EU dictatorship in our hemisphere. Its purpose is to destroy the sovereignty of every nation in our hemisphere just as is happening to England and all other member nations of the EU. Just as the EU has the Euro as its currency, the FTAA intends to usher in the "Amero" as our currency (2)

3. In England, the ruling Labour Party of Tony Blair totally IGNORED over a million English vitamin consumers when they signed petitions in English health food stores totally opposing England's harmonizing their vitamin laws to the mindlessly restrictive EU Food Supplement Directive, and the EU Parliament totally ignored millions of emails sent to them on the day of the vote demanding that they not pass the FSD into law. When Matthias Rath, MD attempted to enter the European Parliament building on the day of the vote in a last ditch effort to educate the Parliamentarians, he was barred from entering by armed guards who told him they regarded him to be a "terrorist" for encouraging people to complain by email. (3)

4. Treaties take precedence over domestic law, and by signing the NAFTA, and GATT trade agreements and the WTO, the US has agreed to enter into a constant process of harmonization of all of its laws\_ we're literally being ripped off our constitutional moorings via treasonous acts being committed by a Congress which is largely owned lock, stock and barrel by multinational corporate interests who control them via PAC donations without which they have difficulty running for reelection. (4)

5. The population of the world is <http://opr.princeton.edu/popclock/> 6,392,358,690 (at 8:39 PM on September 20, 2004). Check it again when you get this message and see how much its increased since I checked. There are very powerful people who pull strings from behind the scenes who want to reduce world population. They have a EUGENICS agenda, and have had one for many centuries. (5)

6. The same exact thing thats going on in the EU is going to happen right here in America (and world wide) unless people take the action steps recommended on the International Advocate for Health Freedom (IAHF) website under the emergency flashing banner at <http://www.iahf.com>
